

# Energy of the Future

Bring your dreams.

# Join us for the 2013-2014 ArtScience Prize

The Boston ArtScience Prize is an after-school program and competition where Sophomores, Juniors and Seniors dream up original art and design ideas around this year's scientific theme – Energy of the Future. From October through May, ArtScience Prize students work in small teams once per week alongside amazing mentors who help bring their ideas from imagination to reality. Every student who completes the program receives funding to further their idea, and one team receives a 10-day trip to Paris, France!

To participate, you must be a Sophomore, Junior or Senior. We look for those with creativity, passion and dedication – we do NOT look at your grades. All ArtScience student nominees must fill out an application with a teacher signature before attending an interview. We hope to see you when we visit your school!
